Customer Notes

Activity #3, Feb 27th

- Filtering needs to be done by BOTH region and focus area
  - E.g. looking over Regina Poverty data, can switch to Moose Jaw Poverty
  - E.g. looking over
- Search bar should be "Region" "Focus Area" and then "Go" or "Apply"
- Search bar/filters should be **always visible** as you browse the results
- Result format should be:
  - 1. Key takeaways & infographic(s)
  - 2. Impact stories and community conversations
  - 3. (Maybe) snippets from long-form content
- Focus areas have long-form content; regions DO NOT
- Mobile view is a good *starting place* but any seriously interested user is going to likely return to the website via desktop at a later day
