User Survey Questionnaire

Rate each task's difficulty/intuitiveness on the following scale:

0 = couldn't do it
1 = difficult to do
2 = doable, but not obvious
3 = easy to do

Task	Rating
Browse key takeaway "snippets" on the home page (there is only 2 for the demo)	3
Go to Search page	3
Search for info related to a particular focus area (for demo purposes, choose "Homelessness")	3
Search for info related to a particular region (for demo purposes, choose "Regina")	3
Go from any impact story to the "long-form" info on the same topic	2
Navigate back to the home page	2

Would you recommend any changes?

- Two ways to get to home page and search page which is not DRY (it is repetetive)
- add more interactive charts or images so user would relate more

Was there anything confusing about the site?

- The layout of the website is good, makes sense
- is it possible to search for specific problem in given region or are those two options ~~still~~ independent of each other?

Did you feel anything was missing?

- more graphics and charts would be better to include just visualize the data
- include the purpose of the website and the user is actually reading (purpose of this report) on the home page
